

Digital Transformation Strategy at Alexandria University

Abdel Aziz Kansowa, President of Alexandria University, announced Alexandria University's strategy for digital transformation in the next academic year 2022, noting that the university has developed an ambitious strategy to transform into an integrated smart university in all educational and applied aspects based on digital transformation and artificial intelligence.

Establishing the Educational Innovations and Distance Learning Unit, according to the strategy will include converting these units into centers for educational innovations and distance learning, and its mission is to deal with all university faculties to convert educational contents into a digital form according to a specific time strategy starting from the next academic year 2021/2022. , in all courses in the faculties of the university.

Kansowa stressed that Alexandria University is working on modernization and change to keep pace with the rapid development globally to put Alexandria University in its rightful place at the international level and to set a time strategy for transformation into a smart university at the educational and administrative level using modern technology and software to develop education. The university in all its aspects, have Internet infrastructure which has been updated, the speed has been increased, the wireless network has been added to the Internet and most of the regulations have been modified to suit the e-learning system, by amending the regulations of the university's colleges and institutes in teaching and examinations. Approval of the "Fundamentals of Digital Transformation" certificate, to be a condition for granting graduate students their degrees, as an alternative to the ICDL certificate, explaining that this comes in activating the decision of the Supreme Council of Universities, considering the Certificate of Fundamentals of Digital Transformation a condition for granting any postgraduate certificate

(diploma - masters - Ph.D.) for registered students, as of September 2020, adding that Alexandria University is the first university The study was transformed into a full-credit hour system, and it is witnessing a development in the policies of the educational process and modern teaching methods through the establishment of the Center for Measurement and Evaluation and the Unit of Educational Innovations and Distance Learning. The university is currently establishing an extension to Alexandria University with a new smart complex.
