Prof. Abdel Aziz Konsowa, President of Alexandria University, congratulated the Faculty of Engineering team (EFFCT) for winning first place in the “Egypt Summit for Community Investment Projects” competition **launched by the Innovators and Geniuses Fund**, in cooperation with the **Hult Prize International Competition Authority**. To compete between **student teams at different Egyptian universities**, which have ideas and prototypes for community projects in the field of clothing and fashion, which can be turned into startup companies.

It is worth noting that the three winning teams will be promoted to participate in the regional competition, which is the penultimate stage of the final Hult Prize competition, which will be held in Paris in August, to compete for financial prizes worth one million dollars, which will be awarded to the best team in the world that wins the competition. So that he can implement his project.

The Hult Prize competition is the largest student competition in the world, with more than 100,000 students participating after qualifying rounds in more than 120 countries. It aims to develop the skills of imagination, creativity, innovation, and entrepreneurship, in order to solve pressing social problems.

It is noteworthy that the Hult Prize competition is organized by **the Hult Business International School, which is a private, non-profit, international academic institution with branches in the United States of America, England, the Emirates, and China**. A group of graduates of the institute have been organizing this annual competition for more than From 10 years.

The idea of the competition is based on the distinct ideas presented by each team, which contribute to providing **solutions to environmental problems, through the manufacture of environmentally friendly products that support environmental and social sustainability**. The final elimination activities of the competition took place, with prizes amounting to 100 thousand pounds among 11 student teams, representing 10 students. Egyptian universities at the Innovation Center (IHub) at Ain Shams University, and the jury, which includes a group of experts and specialists, identified the winning student teams in the first three places.
