

**Alexandria University is committed to
the Sustainable Development Goals (SDGs)**

Universities have a critical role to play in achieving the SDGs and are at the forefront of developing practical solutions to the social, economic and environmental challenges of the SDGs. Through teaching, our universities equip the next generation of leaders and innovators with the knowledge and skills to address sustainable development challenges. Through research and technical expertise, universities are at the forefront of developing practical solutions to the social, economic and environmental challenges of the SDGs

Alexandria University is committed to the Sustainable Development Goals (SDGs), following an announcement [Egypt 2030 Strategy](#)

The 17 Sustainable Development Goals, adopted by all countries at the United Nations, are aimed at bringing global economic prosperity, social inclusion and environmental sustainability. They include goals for health, education, gender equality, jobs, climate change, the environment and justice and apply to all countries.

Professor Konsowa, the president of Alexandria University said that the University promotes the principles of the Sustainable Development Goals through world leading research, innovation and education and is proud to play its part in all aspects as a Commitment to the Sustainable Development Goals (SDG).

Alexandria University strive to ensure its campuses and major programs are environmentally sustainable and socially inclusive, a part of the global network of universities and knowledge institutions that mobilise global scientific and technological expertise in support of sustainable development and the SDGs.
